LAB6 - TFT

LAB6 - TFT

Part2:

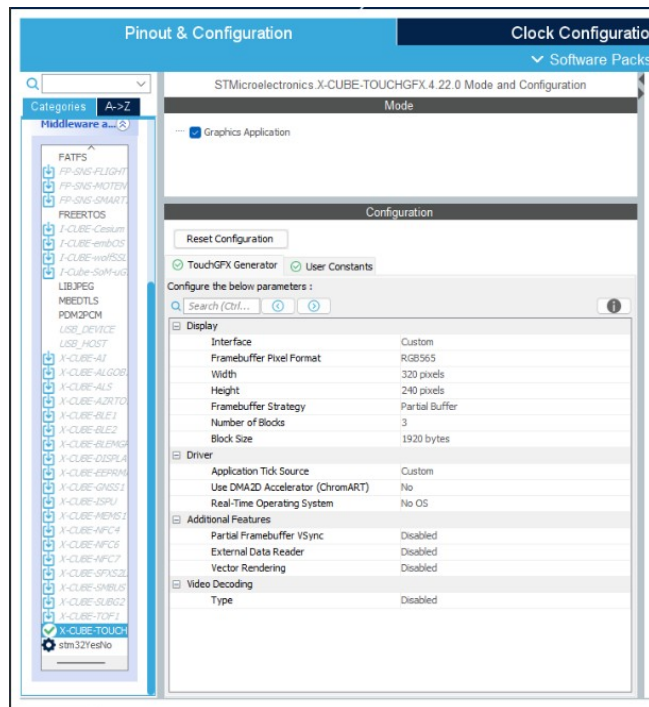

Add the following TFT driver from Mauro De Vecchi and configure it for your project:

<https://github.com/meldundas/ILI9XXX-XPT2046-STM32>

Configure it in TouchGFX – full mode.

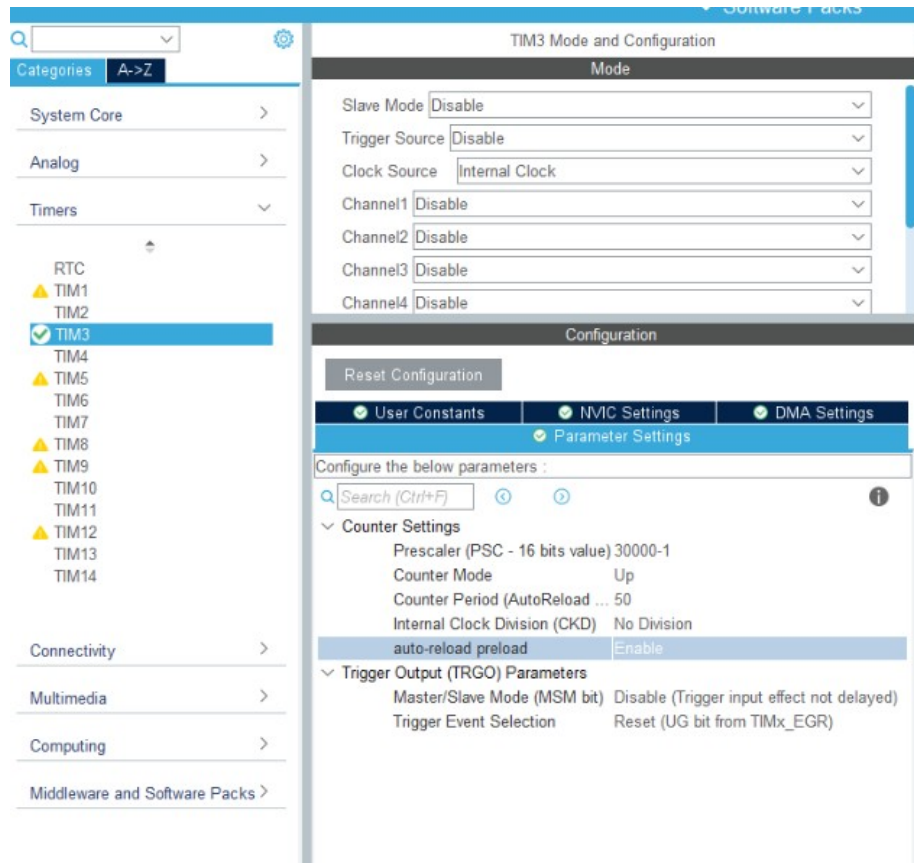

Part3:

Add and Configure the TouchGFX library

LAB6 - TFT

Setup timer 3 for 60 frames/sec refresh.

In TouchGFX, add your name to the screen below the ECET260 in a different color.

By the start of Lab7, upload a picture of your TFT screen to the D2L assignments Lab6 folder.
